### **ITS NOT JUST A MOVIE**

---

Do yourself a favour. Go see *An Inconvenient Truth*. If you are a parent of older children, take them. It will give you some common ground to consider. If you are a secondary teacher, take your students. If you are a rational human being, take yourself. Whether you are convinced by what you see or not, every other subject is trivial by comparison.

### **Ten Years... to the Tipping Point**

---

James Hansen, of the Goddard Institute for Space Studies warns we have 10 years to take decisive action on global warming or face a weather catastrophe.  
" I think we have a very brief window of opportunity to deal with climate change, no longer than a decade, **at the most** ... if the world continues with business as usual ... temperatures will rise by two to three degrees Celcius ... and we will be producing a different planet."  
SMH 18.9.06.

**FOR RESERVATIONS:** An early call to 4982-0699 or 4981-0170, followed by payment by Wednesday 25th Oct 2006 to EcoNetwork An Inconvenient Truth, PO Box 97, Nelson Bay, 2315 will secure your reservations.

Humanity is sitting on a ticking time bomb. If the vast majority of the world's scientists are right, we have just ten years to avert a major catastrophe that could send our entire planet into a tail-spin of epic destruction involving extreme weather, floods, droughts, epidemics and killer heat waves beyond anything we have ever experienced.

If that sounds like a recipe for serious gloom and doom -- think again. AN INCONVENIENT TRUTH offers a passionate and inspirational look at one man's fervent crusade to halt global warming's deadly progress in its tracks by exposing the myths and misconceptions that surround it.

With wit, smarts and hope, AN INCONVENIENT TRUTH ultimately brings home Gore's persuasive argument that we can no longer afford to view global warming as a political issue - rather, it is the biggest moral challenge facing our global civilization.

[Y]ou don't need to like Gore, or trust him, or even *believe* him to get a swift kick in the pants, one that'll scare the hell out of you...

If you see only one movie this year, make it An Inconvenient Truth. It may not be the year's best movie, or its most entertaining, but it's certainly the most terrifyingly crucial.

*Truth* succeeds at cutting through the clutter surrounding global warming by making a clear, compelling case for how our actions are affecting the planet.

Will likely make you admire Al Gore a little more than you already do, worry about the planet a lot more than you already do, and finally, leave you with as many questions as when you started.

We thank you in advance for your support of EcoNetwork. EcoNetwork is a vital community organization dedicated to preservation of our fantastic environment and your way to learn about, understand and get involved in important issues that impact the conservation and natural heritage of the region. EcoNetwork has been active for 13 years and has never benefited from funding other than that which we generate ourselves. That's why these fund raising events are so important... and more so given the Marine Park campaign and now the Climate Change campaign we're undertaking. We need your support.
